Frontend / Fullstack Developer with 4 years of commercial experience in React, Next.js and TypeScript. At Landingi I build analytics and AI products that run at scale: EventTracker, handling over 1.2M sessions per day, and Solis, an AI agent used by several hundred customers. I translate business requirements into technical solutions, keeping the customer's needs at the center. I ensure code quality through testing, code review and shared team standards.

// SKILLS

Languages	TypeScript, JavaScript, HTML	**Frontend**	React, Next.js
UI and styling	CSS, Tailwind CSS, shadcn/ui, CSS Modules, Storybook, i18next	**State and data**	Redux Toolkit, TanStack Query, SWR, React Hook Form, Zod, Axios
Backend and databases	Node.js, Express, REST API, Prisma, PostgreSQL, MongoDB, Supabase	**Testing**	Vitest, Testing Library, Playwright
Tools and deployment	Git, GitHub, GitHub Actions, Vite, Vercel, Figma, n8n, Sentry, Mixpanel, Lokalise	**AI at work**	Claude Code, Codex, Mastra, Vercel AI SDK, MCP

// EXPERIENCE

Frontend Developer · Landingi

05.2023 – present

- Lead projects from concept to release: design the architecture, split the work and coordinate it with PM, UI/UX and backend. Together with the team, build a new SPA from scratch (**React, TypeScript, Vite**) as part of a full platform rebuild that removes technical debt.
- **EventTracker** (over 1.2M sessions per day): client-side architecture and the entire frontend. A < 25 kB tracking script in plain TypeScript (sendBeacon with throttling, no impact on customers' Core Web Vitals) and an analytics dashboard in React, SWR and Recharts. Its data powers over a dozen other platform features.
- **Solis**, an AI agent for landing page optimization used by several hundred customers: frontend in React and TypeScript, a Mastra agent with data-fetching skills, response streaming (Vercel AI SDK), model selection balancing cost and quality, caching and context trimming, and handling of model errors and timeouts.
- **Bringing AI into the team's workflow**: introducing AI-driven development and building AI skills and automations with Codex and Claude Code for Jira tasks, PR drafts and code review, used by the whole team. Preparing projects and repositories for agent-managed development: writing AGENTS.md and CLAUDE.md files, skills and environment configuration that keep agents aligned with team standards.
- **Internationalization from scratch**: 6 languages and over 5,000 keys, two-way Lokalise automation in GitHub Actions, and a script detecting unused keys that lowered the subscription cost. Translators work without developer involvement.
- **Error monitoring with Sentry**: a shared reporting function on every API call, rich context (user, release, breadcrumbs) and noise filtering. Production errors are caught faster, in some cases before a customer reports them.
- **Product analytics standard in Mixpanel**: tracking plan, a single event-sending function, data cleanup and documentation that let PMs analyze data on their own.
- Development of AI products **Lunar** (landing page generator) and **Orbit** (MCP server), the frontend of an AI customer support chat integrated with n8n, and the company's Storybook component library tested with Vitest and Testing Library.

Junior Frontend Developer · Devs-Mentoring

01.2023 – 05.2023

- Web application (React, TypeScript) for sharing and peer-reviewing programming projects: responsive views built from Figma designs, tested with Jest.

// EDUCATION

Bachelor's degree, Management (Brand & PR) 2019 – 2022
WSB – National Louis University, Nowy Sącz, Poland

// LANGUAGES

Polish: native · English: B2

// INTERESTS

Astronomy, squash, Polish Ekstraklasa football.

// COURSES AND CERTIFICATES

The Ultimate Next.js 16 Course 10.2026
JS Mastery · Next.js, React, TypeScript

Umiejętności Jutra (Skills of Tomorrow): AI 03.2025
Google & SGH Warsaw School of Economics

Frontend Developer 01.2024
MegaK · JavaScript, TypeScript, React, Next.js, Figma

Fullstack JavaScript Developer 10.2022
MegaK · Node.js, Express.js, NestJS, MongoDB, MySQL, React
